Revision of Relative pronouns: *who, which, whose, where, when*

Functions:

Adding extra information using relatives

Vocabulary:

Transportation and ways of travelling worldwide

Learning strategies:

When I read a text I...

Lesson 1

AIMS

- To raise awareness of idiomatic expressions about 'travel'

Lead-in

Imagine you are preparing a speech about people's use of different means of transport in your area.

Make a list of four ways people get around in your town or city and write down the main reason why they use this form of transportation.

Transportation	Reason
1.	
2.	
3.	
4.	

Task 1

Look at the situations 1-6 below and decide what the best means of transport for each person would be. Match the sketches to the descriptions below.

 b) a father of three children **who** lives in a village in Macedonia
 c) a young working mother **who** lives in a place **where** there are no buses

Complete the table on the right with examples of means of transport for each category.

most exciting	most unusual	most useful

Would you like to try any of these means of transport? Why? Why not?

B. Look at the word 'transport'. In pairs, decide what the two parts of the word are. In pairs, make a list of other words with 'port' in them and then compare your list with the class. What do you think 'passport' first meant?

Speaking

Task 3

*In which countries do people use the means A-F in Task 2 to travel?
Tell the class why these means of transport are best suited for each of the countries.
Can you find these countries on the map in Appendix VI on p.186-187?*

Example: The camel is best suited for the desert because it can travel long distances without water.

Task 4 - The 'principle'

A. In pairs, read the following statement and decide what the 'principle' is.

Nearly every machine built in the last 250 years involves a single, basic principle.

B. Which picture from A-F in Task 2 uses this principle?

Task 5 - Mini-project

Make your own poster: Changes in means of transport through time

In pairs, make a list of other means of transport that you can think of. Find photos about different means of transport and make a poster to use to talk about transportation.

Task 6 - Idioms *Look at the sketches 1-3 and match each one to an idiom about horses. Then match them to the explanation a-c.*

a

b

c

How is the bike in picture c different from an ordinary bike? In pairs, write down the differences and then read text A below quickly to check your answers.

A The Sideways Bike

An inventor has made a bike that travels sideways. It might drive some people crazy when they try to ride it, but they soon get used to it. The cyclist sits sideways and operates a wheel with each hand, and pedalling makes the whole bike travel sideways. But, hold your horses! It's very like snowboarding or sailing, isn't it? "Yes", says the inventor, Michael Killian who is an engineer from Dublin. "And it's not a normal bike, is it?" "No", he replies. Is this the end of the road for the ordinary bike? Perhaps not! It's just that this way of travelling by bike is much more fun. So, don't miss the boat, go and get one now!

Task 2

Read two more articles about transport and find out which of the three sounds the most exciting. Why?

Innovative means of transport

B Skateboarding

The good weather's here and you just want to get the skateboard out and hit the road, don't you? Well, go on! With your skateboard you're free to go wherever you want. You don't have any backseat driver telling you where to go. Another advantage is that you don't need to use public transport and it's good fun and keeps you fit, too. But you don't want to get hurt when you do those flips, do you? So, be careful and not take any risks doing complicated flips and turns at top speeds.

C Biking on water

A new water bike which will not rock the boat in the shipping world, but will be a great form of enjoyment to many people, was tested in Portsmouth last week. No, I am not taking you for a ride. It sounds strange, doesn't it, but, a new invention means cyclists do not have to pedal for miles along a river bank looking for a bridge. Italian designers have created a plastic kit which, when attached to any bike, enables it to float and ride. It is not cheap but the invention gives a whole new meaning to treading water. Getting the bike ready for the water is plain sailing. So, next time you go on holiday, ask your travel agent for a beach resort with water bikes.
